

Giving Businesses Peace of Mind 24 Hours a Day... GUARANTEED!

Rock Solid Systems protect your business from the serious effects of data loss.

As Ireland's leading indigenous supplier of backup solutions hundreds of clients throughout the country rely on us 24 hours a day 365 days a year to protect their most valued business asset...their data.

OUR MISSION

To minimise the cost and inefficiency associated with unprotected and unmanaged data.

DATA SHIELD

Data Shield™ is our flagship backup service that automatically manages and protects client data.

Data Shield™ provides you with 4 distinct benefits:

Fulfils both your Legal and Moral Obligations to Your Client.

Under the Data Protection Act you have a duty of care to guarantee the integrity and availability of your client's data at ALL times. Failure to do so exposes you to loss of reputation and prosecution. Data Shield™ provides that duty of care and removes any threat of legal action caused by data loss.

Protection from Effects of Data Loss.

Theft, fire, human error and malicious acts can cause loss of critical data. Could you confidently run your business if some or all your client data was no longer available? With Data Shield™ you can be up and running again in as little as 5 minutes.

Lowers IT Costs.

Over 30% of all IT related issues revolve around data recovery. Data Shield™ removes all your data recovery problems and enables your IT staff to focus on more important tasks like making your business technologically more effective and efficient but reduces the needs for frequent hardware upgrades caused by bloated hard drives.

Removes the Need for Human Intervention.

If you operate a media based backup system you have to rely on people to manage the backup. Data Shield™ eliminates the need for any human intervention or backup media.

What does Data Shield™ provide me?

- A fully managed, proactive data backup service
- Daily Notification of Backup Status
- Proactive monitoring and management of data growth
- Daily and monthly data growth reporting
- 24x7 support staff availability
- World class Data Hosting centre infrastructure
- State of the art AES 256 encryption security to guarantee data confidentiality
- Dedicated Account Manager
- Remote **and** onsite backup support available

The DATA SHIELD™ 3 Step Process

1. Analysis:

Your current data is analysed and evaluated according to its importance to your business.

2. Reporting & Planning:

Business Critical Data is identified first, with the remaining data to be archived or deleted. Lastly, a data retention and deletion policy is confirmed.

3. Management:

Rock Solid Systems:

- Implement the archive policy
- Set up the Removal and Retention plans
- Identify and resolve errors daily;
- Perform Data Recovery tests intermittently
- Provide monthly reporting and diary regular meeting with your Account Manager.

DON'T TAKE OUR WORD FOR IT...

"I bought an online backup service for \$50 a year through the website of a US company.

"After 5 months I had a system crash. Much to my horror I found that the initial backup not been done properly and I lost a number of critical files and folders.

"I had the embarrassing task of contacting my clients and getting them to send on files I had lost.

"I moved to Rock Solid Systems and realised very quickly that there was no comparison in service and that I have now complete confidence in the availability of my files.

"Most importantly I can actually talk to someone without worrying about phone costs and time zones."

Damien Clothier, Precipio

"I was having problems with my computer server as it was running very slowly and the files were disorganised. We were constantly upgrading our hardware and memory to maintain performance. Rock Solid Systems did a data audit and management exercise and archived all our redundant data and deleted files that were duplicated and not business related.

Since then the system has been running more efficiently. I would strongly recommend this service."

Mike Gaffney, LEAP Consulting

"Our offices were broken into and our computers and servers stolen. It was an absolute disaster for us.

After the delivery of the new computers Rock Solid Systems recovered all our client data and we were back up and fully running in just 2 days. I find them very professional and I have no hesitation in recommending them.

It was the best money I ever spent, and they continue to provide an excellent backup service to us."

Niall Fitzgerald, Fitzgerald Insurances

"The System is easy to manage – it takes all the burden of backing up right out of our hands and just does everything automatically."

Harry McCullagh, Harry McCullagh & Co. Solicitors, Cork
